

TakeOver'26 Hackathon

Problem Statements by Theme & Industry

This document organizes all provided use cases into the eight official hackathon themes. Each theme contains the industries it covers along with curated problem statements that participants can choose from or build upon.

Theme 1: Business Digitization

Theme Overview

Many SMEs still rely on paper records, messaging chats, spreadsheets, or disconnected tools. This track focuses on digitizing business operations and enabling organizations to transition to modern, integrated digital workflows.

Target Industries

- Retail & Local Businesses
- Restaurants & Cafes
- Education
- Healthcare
- Hospitality
- Real Estate
- Manufacturing
- Agriculture
- Service Businesses

Curated Problem Statements

- **Digital Business Operations:** Businesses still rely on manual records, spreadsheets, and messaging platforms for managing daily operations, resulting in lost information, delayed responses, and poor operational visibility.
- **Offline-to-Digital Commerce:** Small businesses have strong offline sales but lack an online presence, digital ordering, payment systems, or customer management capabilities.
- **Paperless Business Management:** Organizations maintain admissions, patient records, employee information, customer details, invoices, and reports manually, making operations slow and error-prone.
- **Multi-Branch Digital Transformation:** Growing businesses struggle to standardize processes across multiple branches due to disconnected systems and inconsistent data.
- **Customer Self-Service:** Customers depend on phone calls for every request because businesses lack digital portals for orders, payments, tracking, and support.

Theme 2: AI Automation & Intelligent Agents

Theme Overview

Build AI-powered assistants, copilots, and autonomous agents that automate repetitive work, improve decision-making, and enhance customer experiences.

Target Industries

- Education
- Healthcare
- Human Resources (HR)
- Legal
- Manufacturing
- Sales
- Customer Support
- Retail

Curated Problem Statements

- **AI Employee Copilot:** Employees spend hours performing repetitive administrative tasks that could be automated using AI assistants.
- **AI Customer Support Agent:** Businesses cannot provide instant responses to customer queries, resulting in delayed support and reduced customer satisfaction.
- **AI Knowledge Assistant:** Students, employees, and customers struggle to find accurate information quickly due to fragmented knowledge sources.
- **AI Document Generation:** Professionals manually create reports, quotations, question papers, invoices, and personalized documents, consuming valuable time.
- **Autonomous Workflow Agents:** Businesses lack intelligent systems that can automatically execute multi-step workflows involving multiple departments and approvals.
- **AI Personalization Engine:** Businesses provide generic recommendations and services instead of personalized experiences based on customer behavior and historical data.

Theme 3: Commerce & Customer Growth

Theme Overview

Enable businesses to sell more, improve customer acquisition, increase retention, and create seamless digital buying experiences.

Target Industries

- E-Commerce
- Retail
- Restaurants

- Grocery
- Marketplace Platforms
- B2B Sales
- Subscription Businesses

Curated Problem Statements

- **Direct-to-Customer Commerce:** Businesses depend heavily on third-party marketplaces, reducing profitability due to high commissions and limited customer ownership.
- **Customer Acquisition & Lead Conversion:** Businesses lose potential customers because enquiries are not followed up efficiently or converted into sales.
- **Shopping Experience Optimization:** Online stores experience high cart abandonment rates, low customer retention, and poor conversion rates.
- **Subscription Commerce:** Subscription-based businesses lack flexible systems for customer plan management, renewals, refunds, and modifications.
- **B2B Digital Sales:** Businesses struggle to handle quotations, bulk orders, negotiations, and procurement digitally.
- **Trust & Marketplace Verification:** Digital marketplaces need mechanisms for seller verification, trust scoring, and fraud prevention.

Theme 4: Operations, Inventory & ERP

Theme Overview

Create intelligent systems that manage inventory, warehouses, procurement, billing, logistics, staff, and operations from a unified platform.

Target Industries

- Retail
- Manufacturing
- Warehousing
- Distribution
- Restaurants
- Agriculture
- Healthcare
- Pharmacy

Curated Problem Statements

- **Smart Inventory Management:** Businesses lack real-time visibility into inventory, resulting in stock-outs, overstocking, and expired products.
- **Multi-Location Inventory:** Organizations cannot efficiently monitor stock movement across multiple warehouses or branches.

- **ERP for SMEs:** Growing businesses require affordable ERP solutions that integrate inventory, finance, HR, procurement, and operations.
- **Intelligent Procurement:** Businesses reorder inventory manually without demand forecasting or automated purchasing recommendations.
- **Operations Visibility:** Business owners lack real-time operational dashboards for monitoring daily activities, productivity, and resource utilization.
- **Asset & Equipment Management:** Organizations struggle to track equipment lifecycle, maintenance schedules, utilization, and service history.

Theme 5: Finance & Business Management

Theme Overview

Digitize accounting, billing, collections, reconciliation, and financial management for small and medium businesses.

Target Industries

- Retail
- Finance
- Lending
- Education
- Hospitality
- Real Estate
- SMEs

Curated Problem Statements

- **Digital Ledger Management:** Businesses maintain customer dues and credit records manually, making tracking and reconciliation difficult.
- **Smart Billing & Payments:** Businesses require automated billing, reminders, online payments, and financial reconciliation.
- **Revenue Intelligence:** Business owners lack accurate visibility into profitability, cash flow, expenses, and financial health.
- **Financial Workflow Automation:** Organizations manually process invoices, receipts, reimbursements, and accounting workflows.
- **Loan & Collection Management:** Lenders require digital systems for managing borrowers, repayments, collections, and payment schedules.
- **Audit & Compliance:** Businesses need transparent financial records, audit trails, and compliance reporting.

Theme 6: Booking, Scheduling & Workforce

Theme Overview

Build intelligent scheduling platforms that optimize appointments, workforce allocation,

reservations, and resource planning.

Target Industries

- Healthcare
- Hospitality
- Sports & Recreation
- Car Rentals
- Professional Services
- Salons & Personal Care
- Education

Curated Problem Statements

- **Appointment Management:** Businesses lose revenue due to manual scheduling, no-shows, and inefficient appointment handling.
- **Intelligent Workforce Scheduling:** Organizations struggle to assign employees efficiently based on skills, availability, and workload.
- **Resource Reservation:** Businesses require centralized booking systems for rooms, vehicles, courts, equipment, and facilities.
- **Dynamic Pricing:** Businesses need demand-based pricing strategies for appointments, bookings, and reservations.
- **Automated Notifications:** Customers miss appointments because businesses lack automated reminders and confirmations.
- **Capacity Optimization:** Organizations cannot efficiently manage booking availability, utilization, and peak demand.

Theme 7: Analytics & Decision Intelligence

Theme Overview

Transform business data into actionable insights through dashboards, forecasting, AI recommendations, and predictive analytics.

Target Industries

- Retail
- Restaurants
- Healthcare
- Manufacturing
- Education
- Marketing
- Finance

Curated Problem Statements

- **Business Intelligence Dashboard:** Businesses lack centralized dashboards for monitoring sales, inventory, operations, and financial performance.
- **Predictive Analytics:** Organizations need forecasting for demand, inventory, staffing, revenue, and customer behavior.
- **Performance Monitoring:** Businesses struggle to measure operational efficiency, employee productivity, and customer satisfaction.
- **AI Decision Support:** Managers require intelligent recommendations instead of raw reports to make better business decisions.
- **Customer Insights:** Businesses need a deeper understanding of customer preferences, purchasing behavior, and engagement patterns.
- **Operational Intelligence:** Organizations require anomaly detection, trend analysis, and proactive alerts for business-critical events.

3Theme 8: Digital Presence & Customer Experience

Theme Overview

Help businesses establish a strong digital identity while delivering engaging, personalized, and seamless customer experiences.

Target Industries

- Small Businesses
- Agencies
- Hospitality
- Real Estate
- Professional Services
- E-Commerce
- Marketing

Curated Problem Statements

- **Business Website & Digital Identity:** Businesses lack professional websites, SEO, and online visibility, reducing customer trust and discoverability.
- **Customer Experience Platform:** Organizations need unified digital experiences for customer onboarding, communication, support, and engagement.
- **Brand & Marketing Automation:** Businesses struggle to maintain consistent branding, social media presence, and marketing campaigns.
- **Customer Engagement & Loyalty:** Businesses need intelligent systems that improve retention through personalization, rewards, and proactive communication.
- **Project & Service Transparency:** Customers need real-time visibility into project status, service progress, and order tracking without repeated follow-ups.
- **Omnichannel Digital Experience:** Businesses require seamless interactions across websites, mobile apps, social media, messaging platforms, and physical stores.

Summary Matrix

Theme	Primary Focus	Example Industries
Theme 1: Business Digitization	Digitizing manual processes	Retail, Education, Healthcare, Hospitality
Theme 2: AI Automation & Intelligent Agents	AI copilots, workflow automation, intelligent assistants	HR, Education, Healthcare, Customer Support
Theme 3: Commerce & Customer Growth	Sales, e-commerce, customer acquisition and retention	Retail, Restaurants, Marketplaces
Theme 4: Operations, Inventory & ERP	Inventory, logistics, ERP, procurement	Manufacturing, Retail, Warehousing
Theme 5: Finance & Business Management	Billing, accounting, payments, reconciliation	Finance, SMEs, Education, Lending
Theme 6: Booking, Scheduling & Workforce	Appointments, workforce, reservations	Healthcare, Hospitality, Professional Services
Theme 7: Analytics & Decision Intelligence	Dashboards, forecasting, AI insights	Retail, Manufacturing, Marketing
Theme 8: Digital Presence & Customer Experience	Websites, branding, customer engagement	SMEs, Agencies, E-commerce, Hospitality
